

Trade Corridors and Marketing

CUSTOMER EXPERIENCE

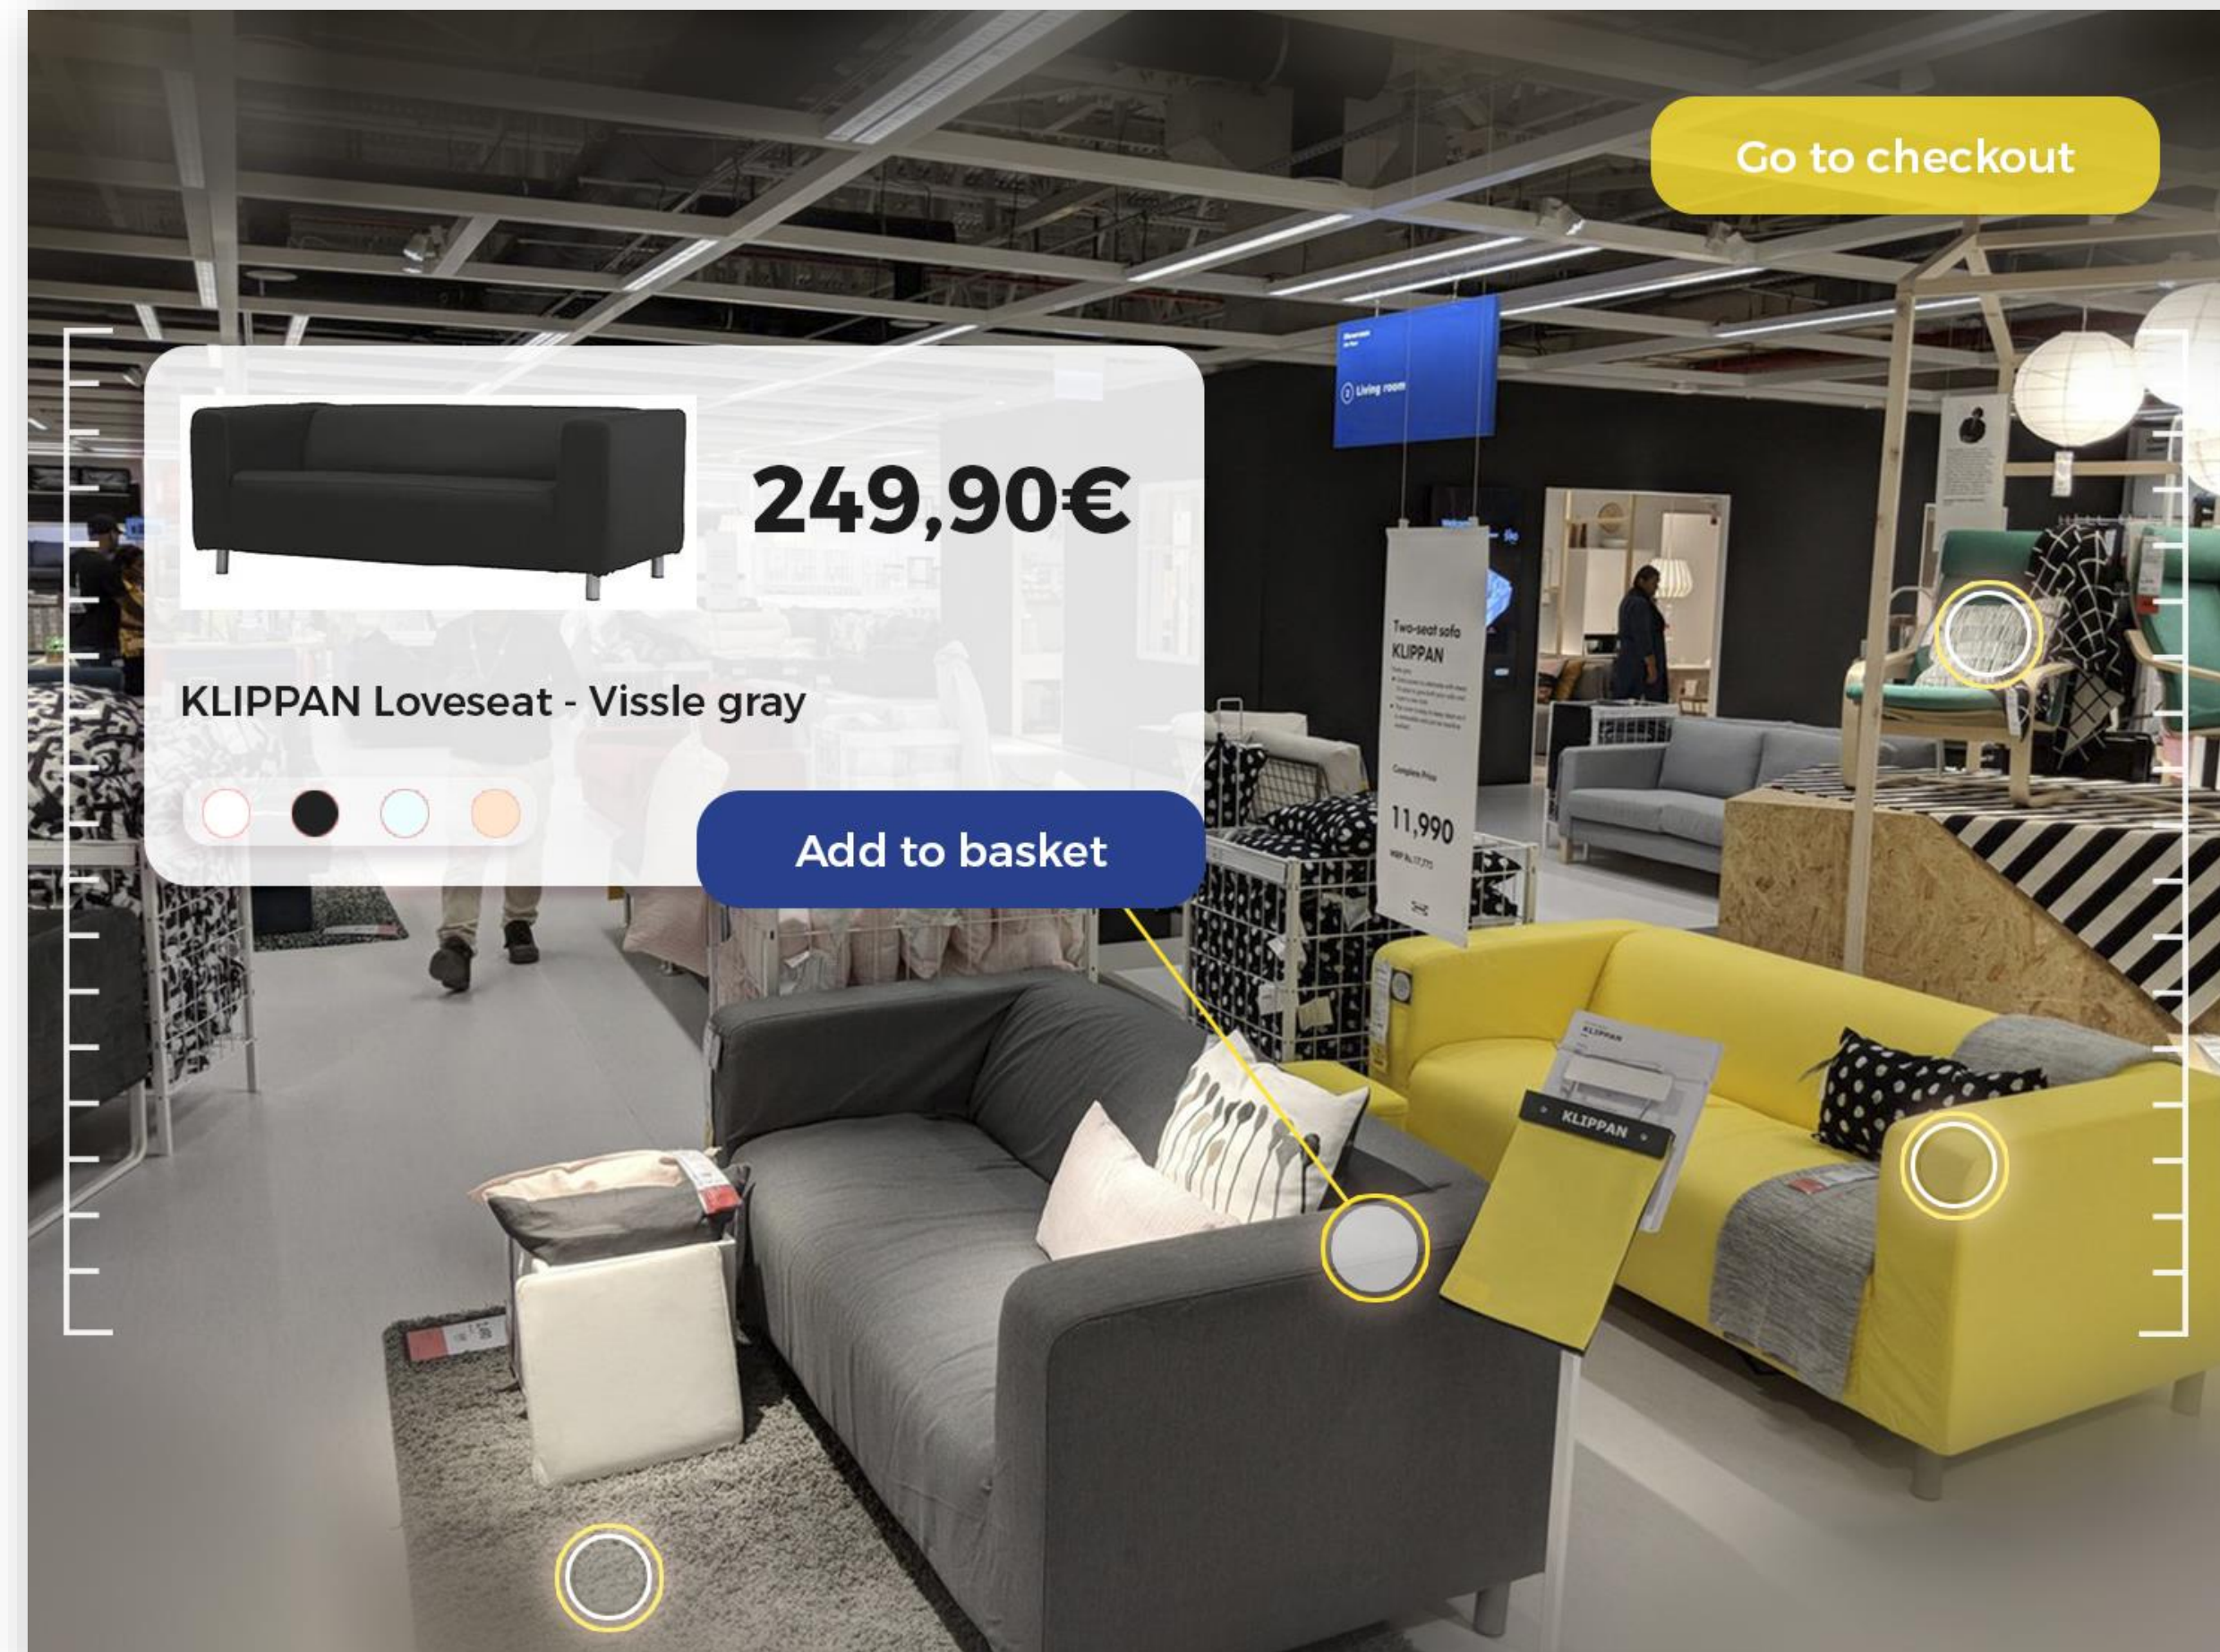

Augmented Reality Spaces

User can point the camera on a product and view product's information and complete order.

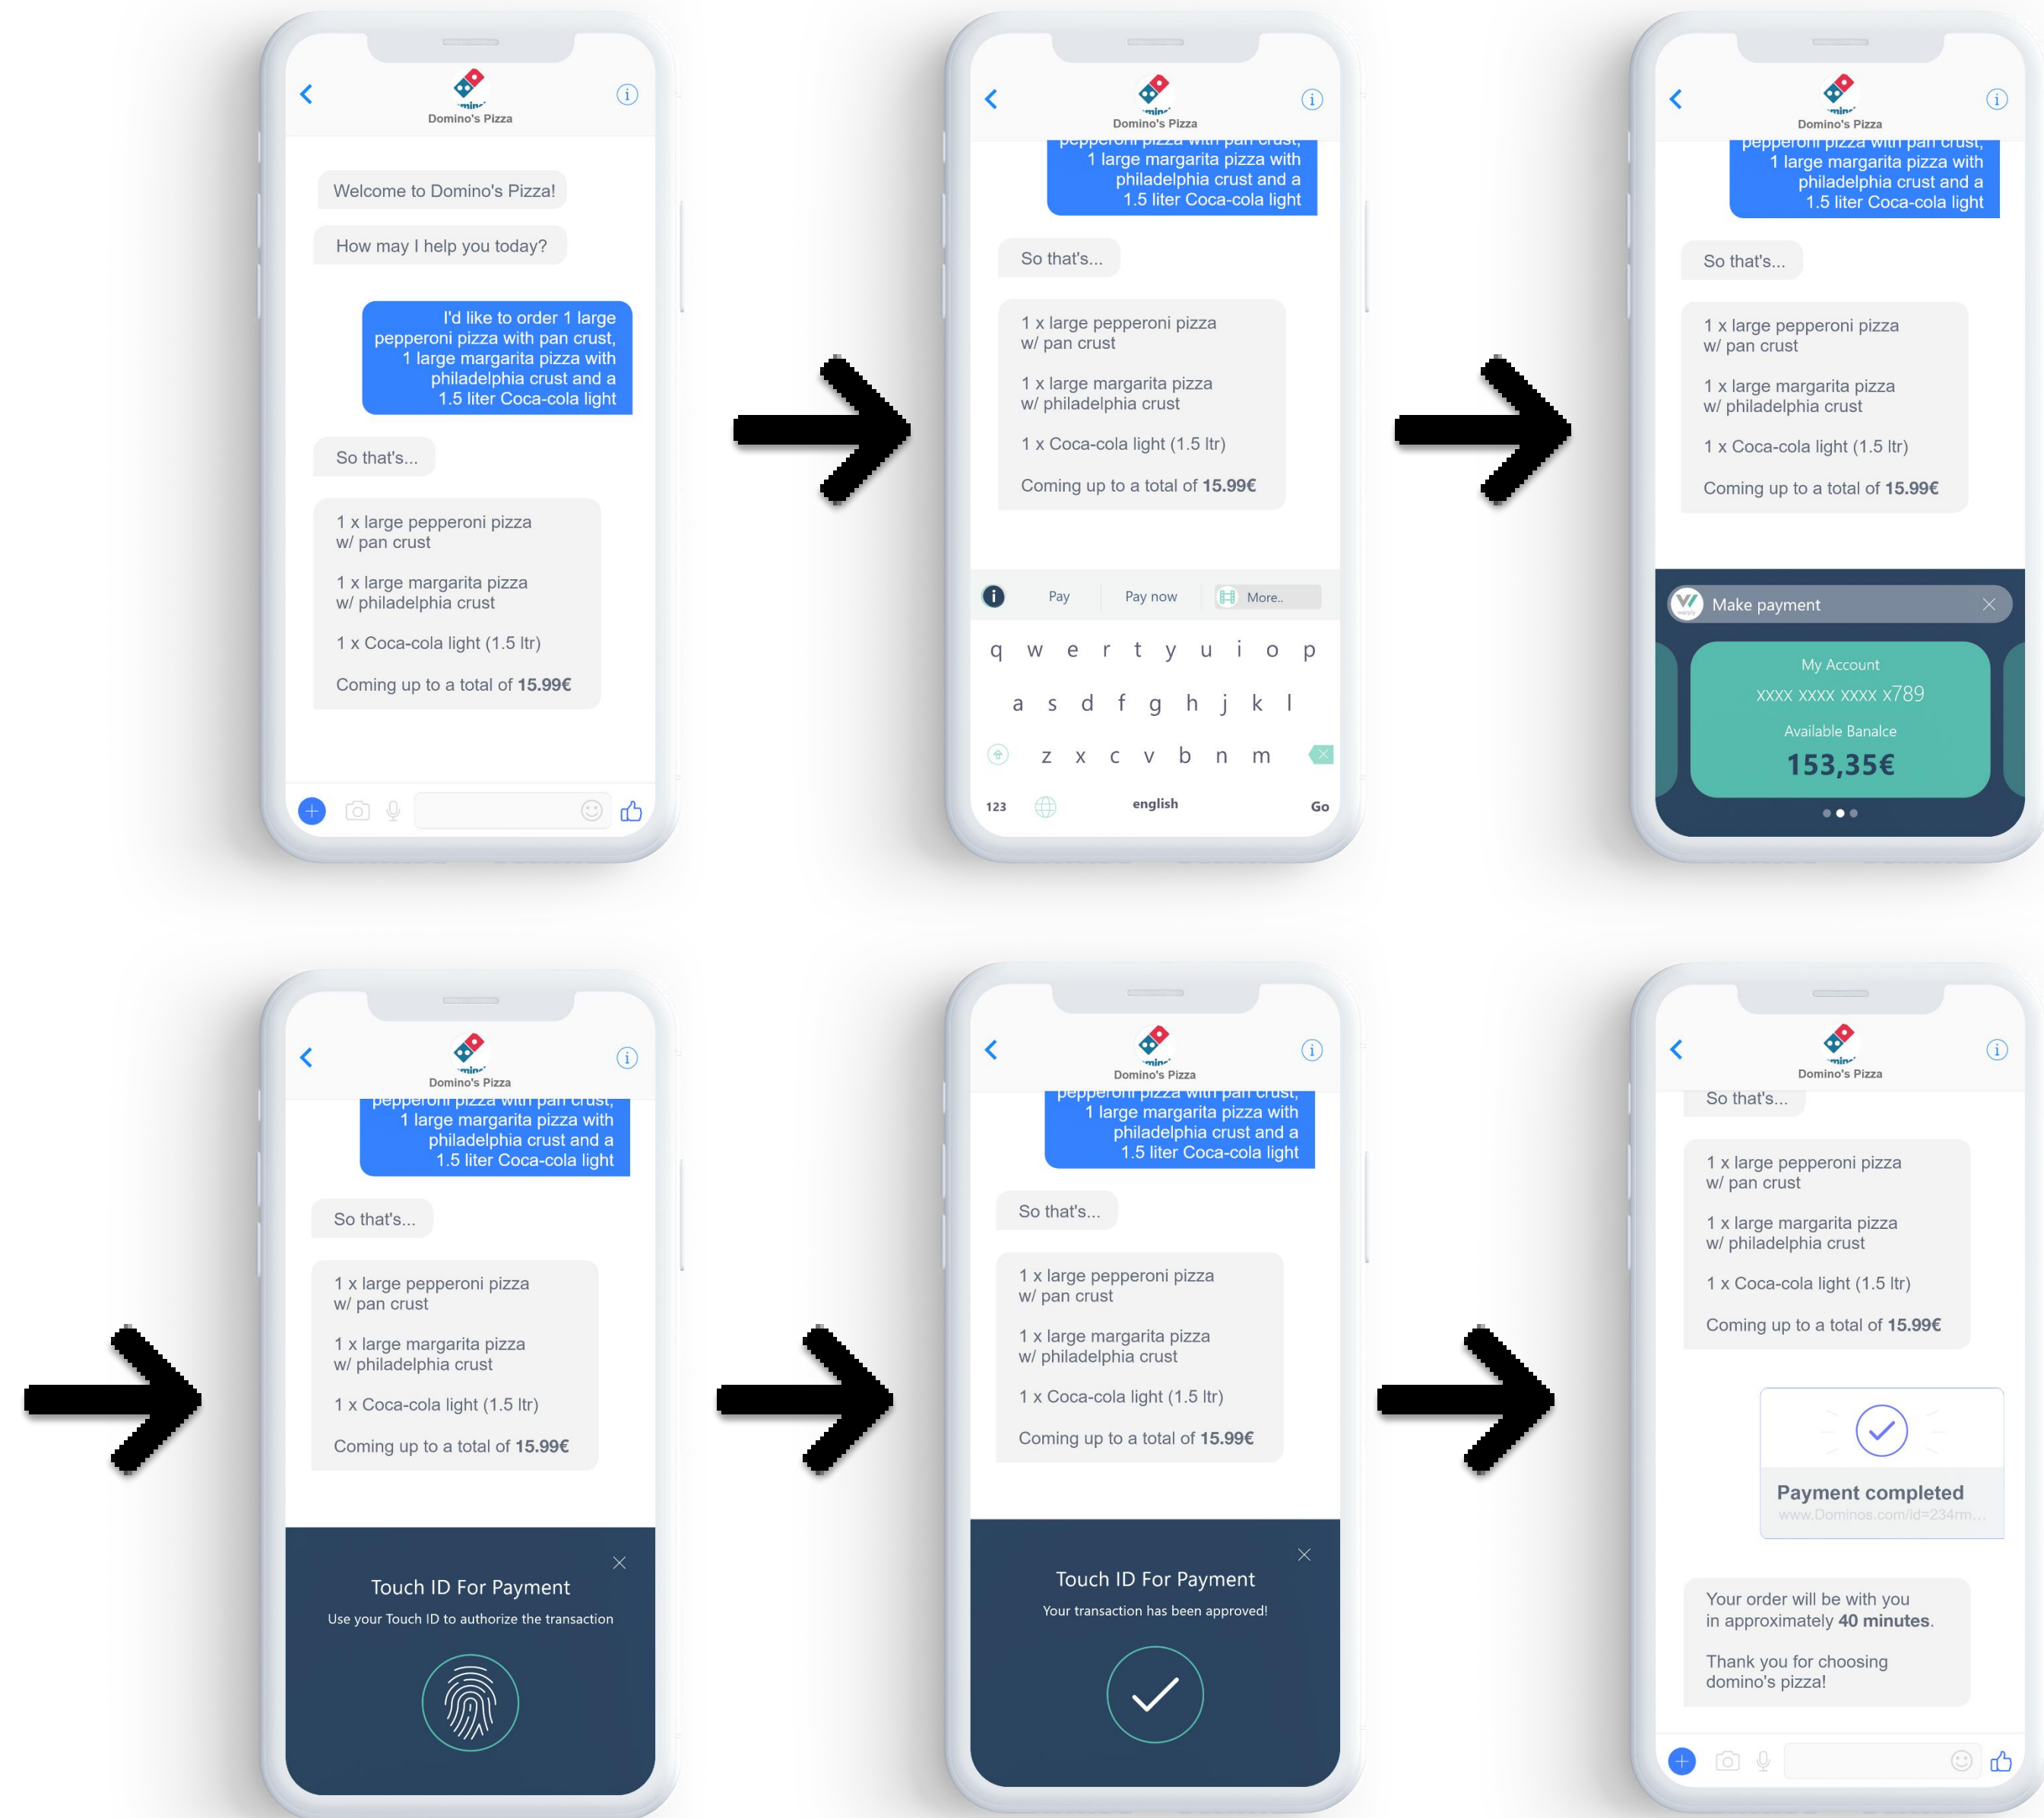

Virtual Reality Stores

Using virtual reality glasses, user can virtually walk into a store, view products, view payment options and perform checkout.

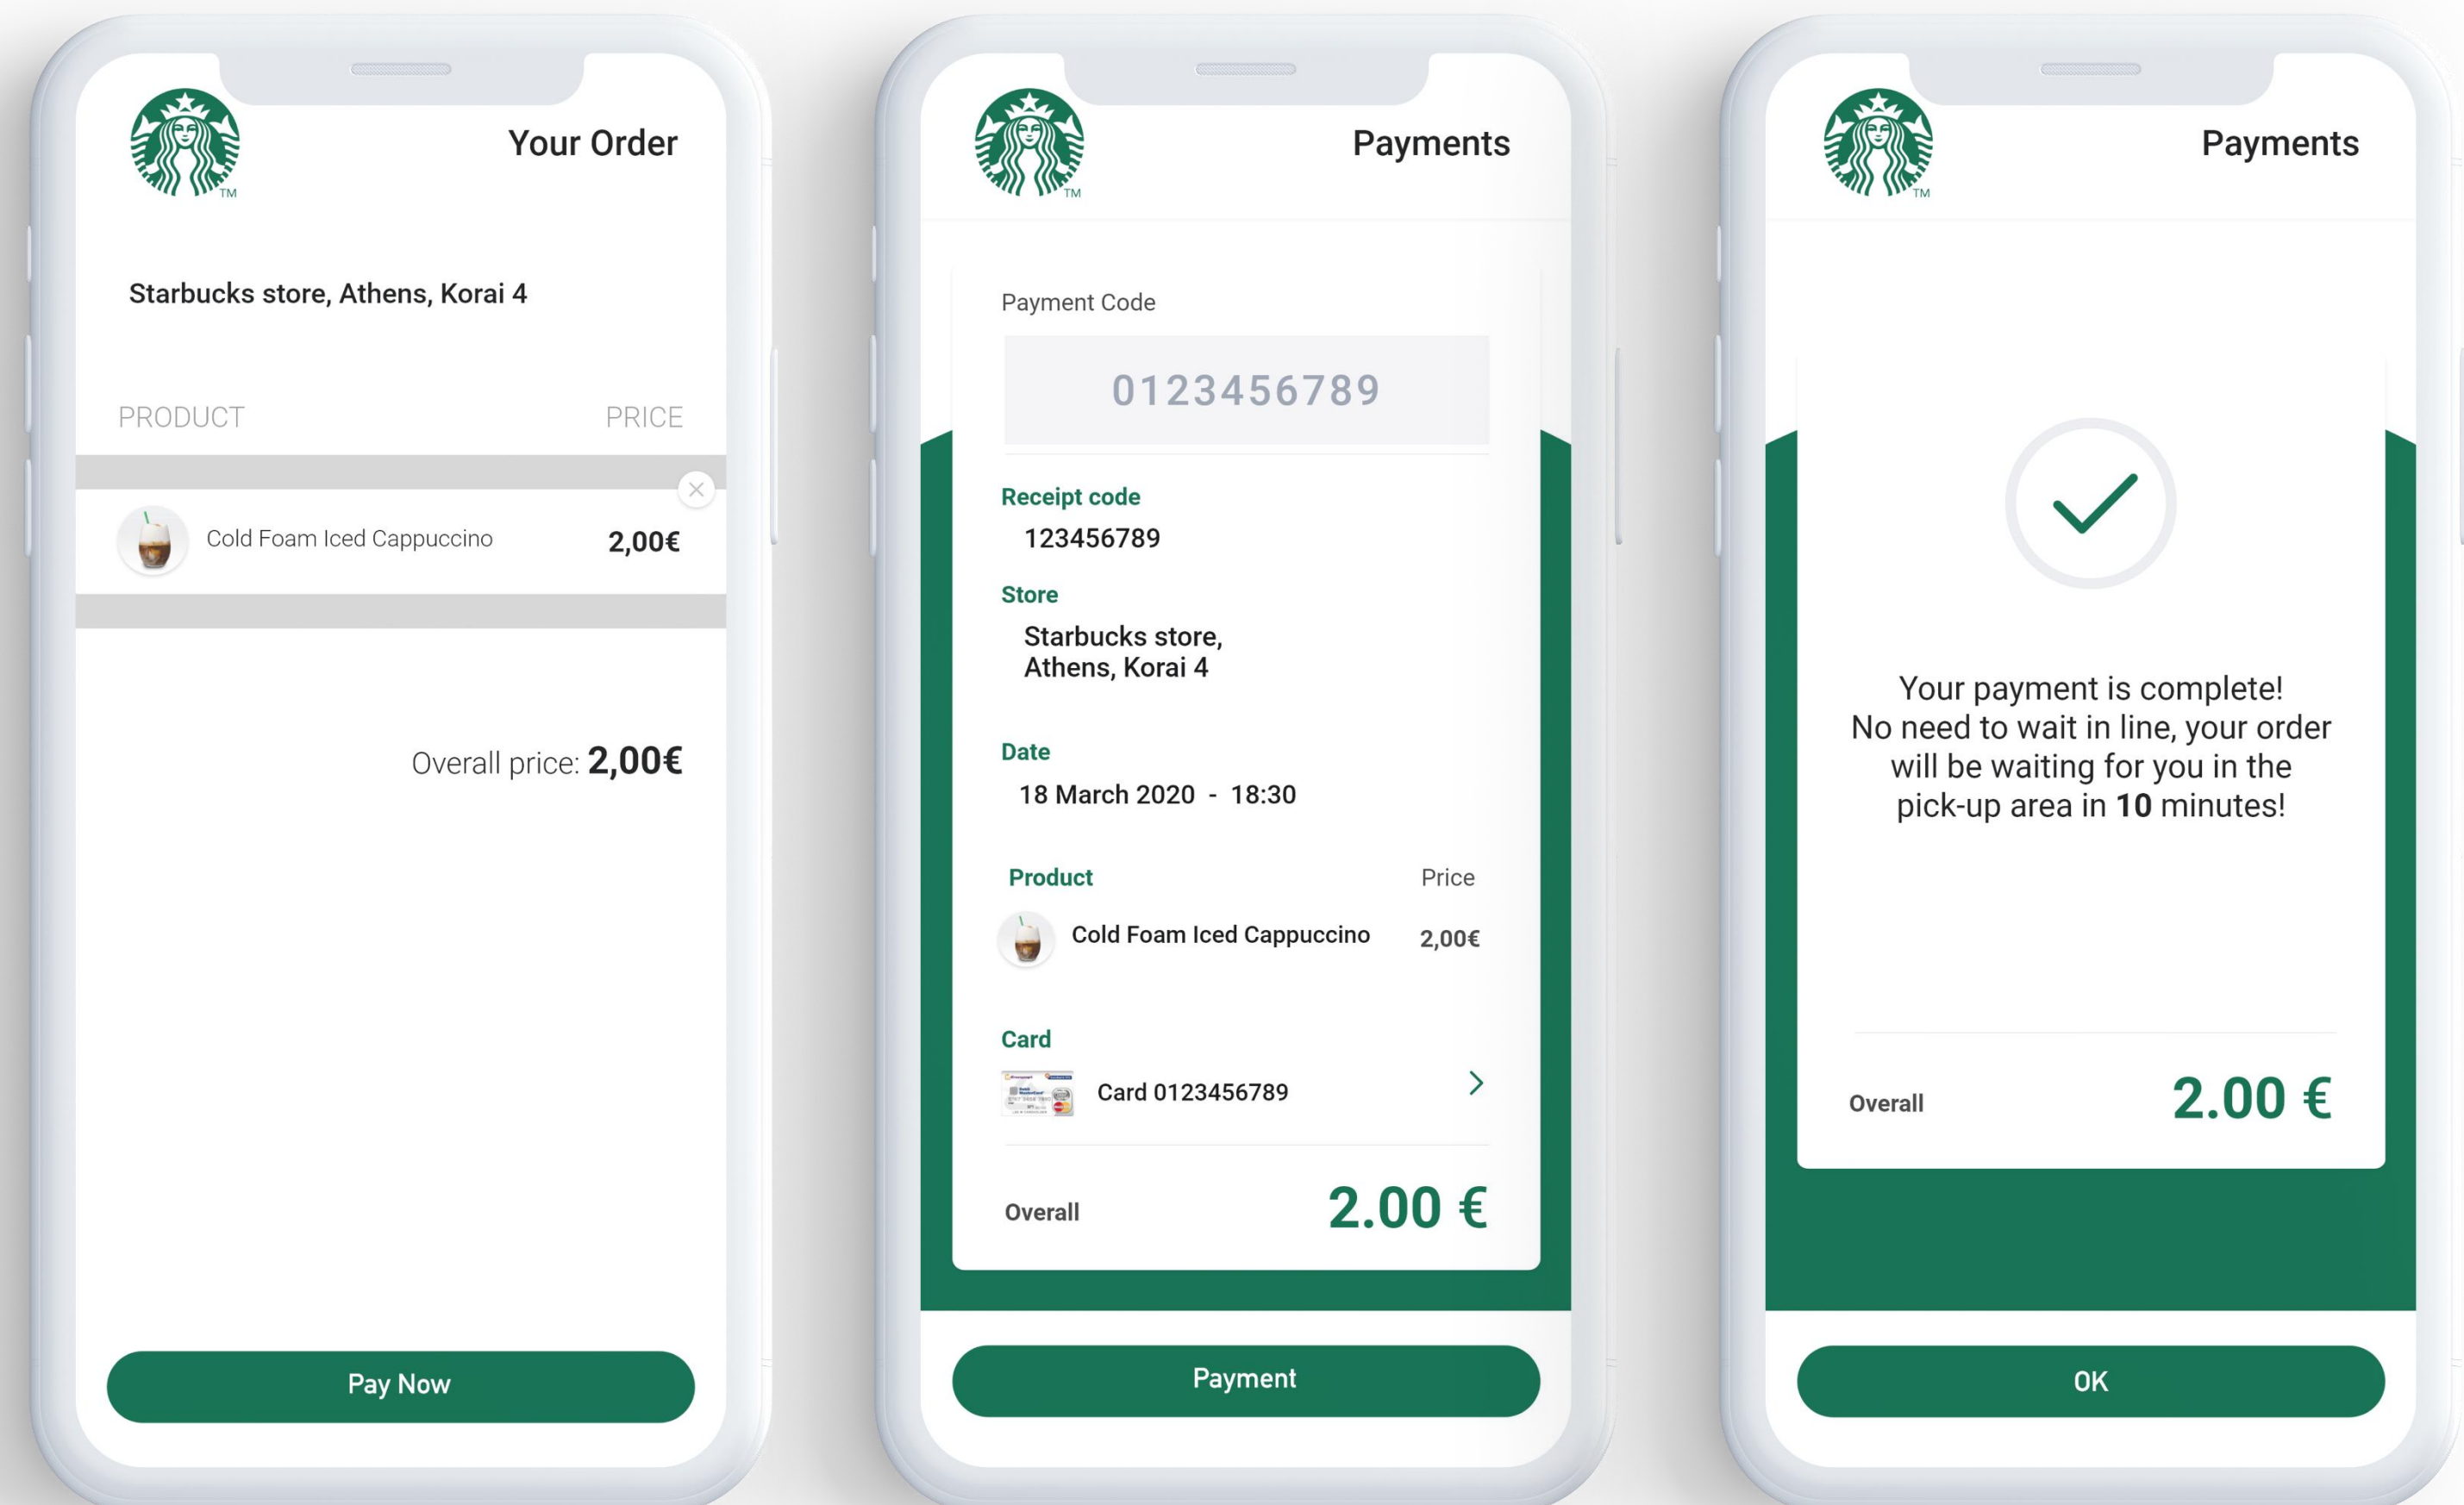

Order from a bot

User can chat with a chatbot and in order to complete an order and pay using the payments keyboard.

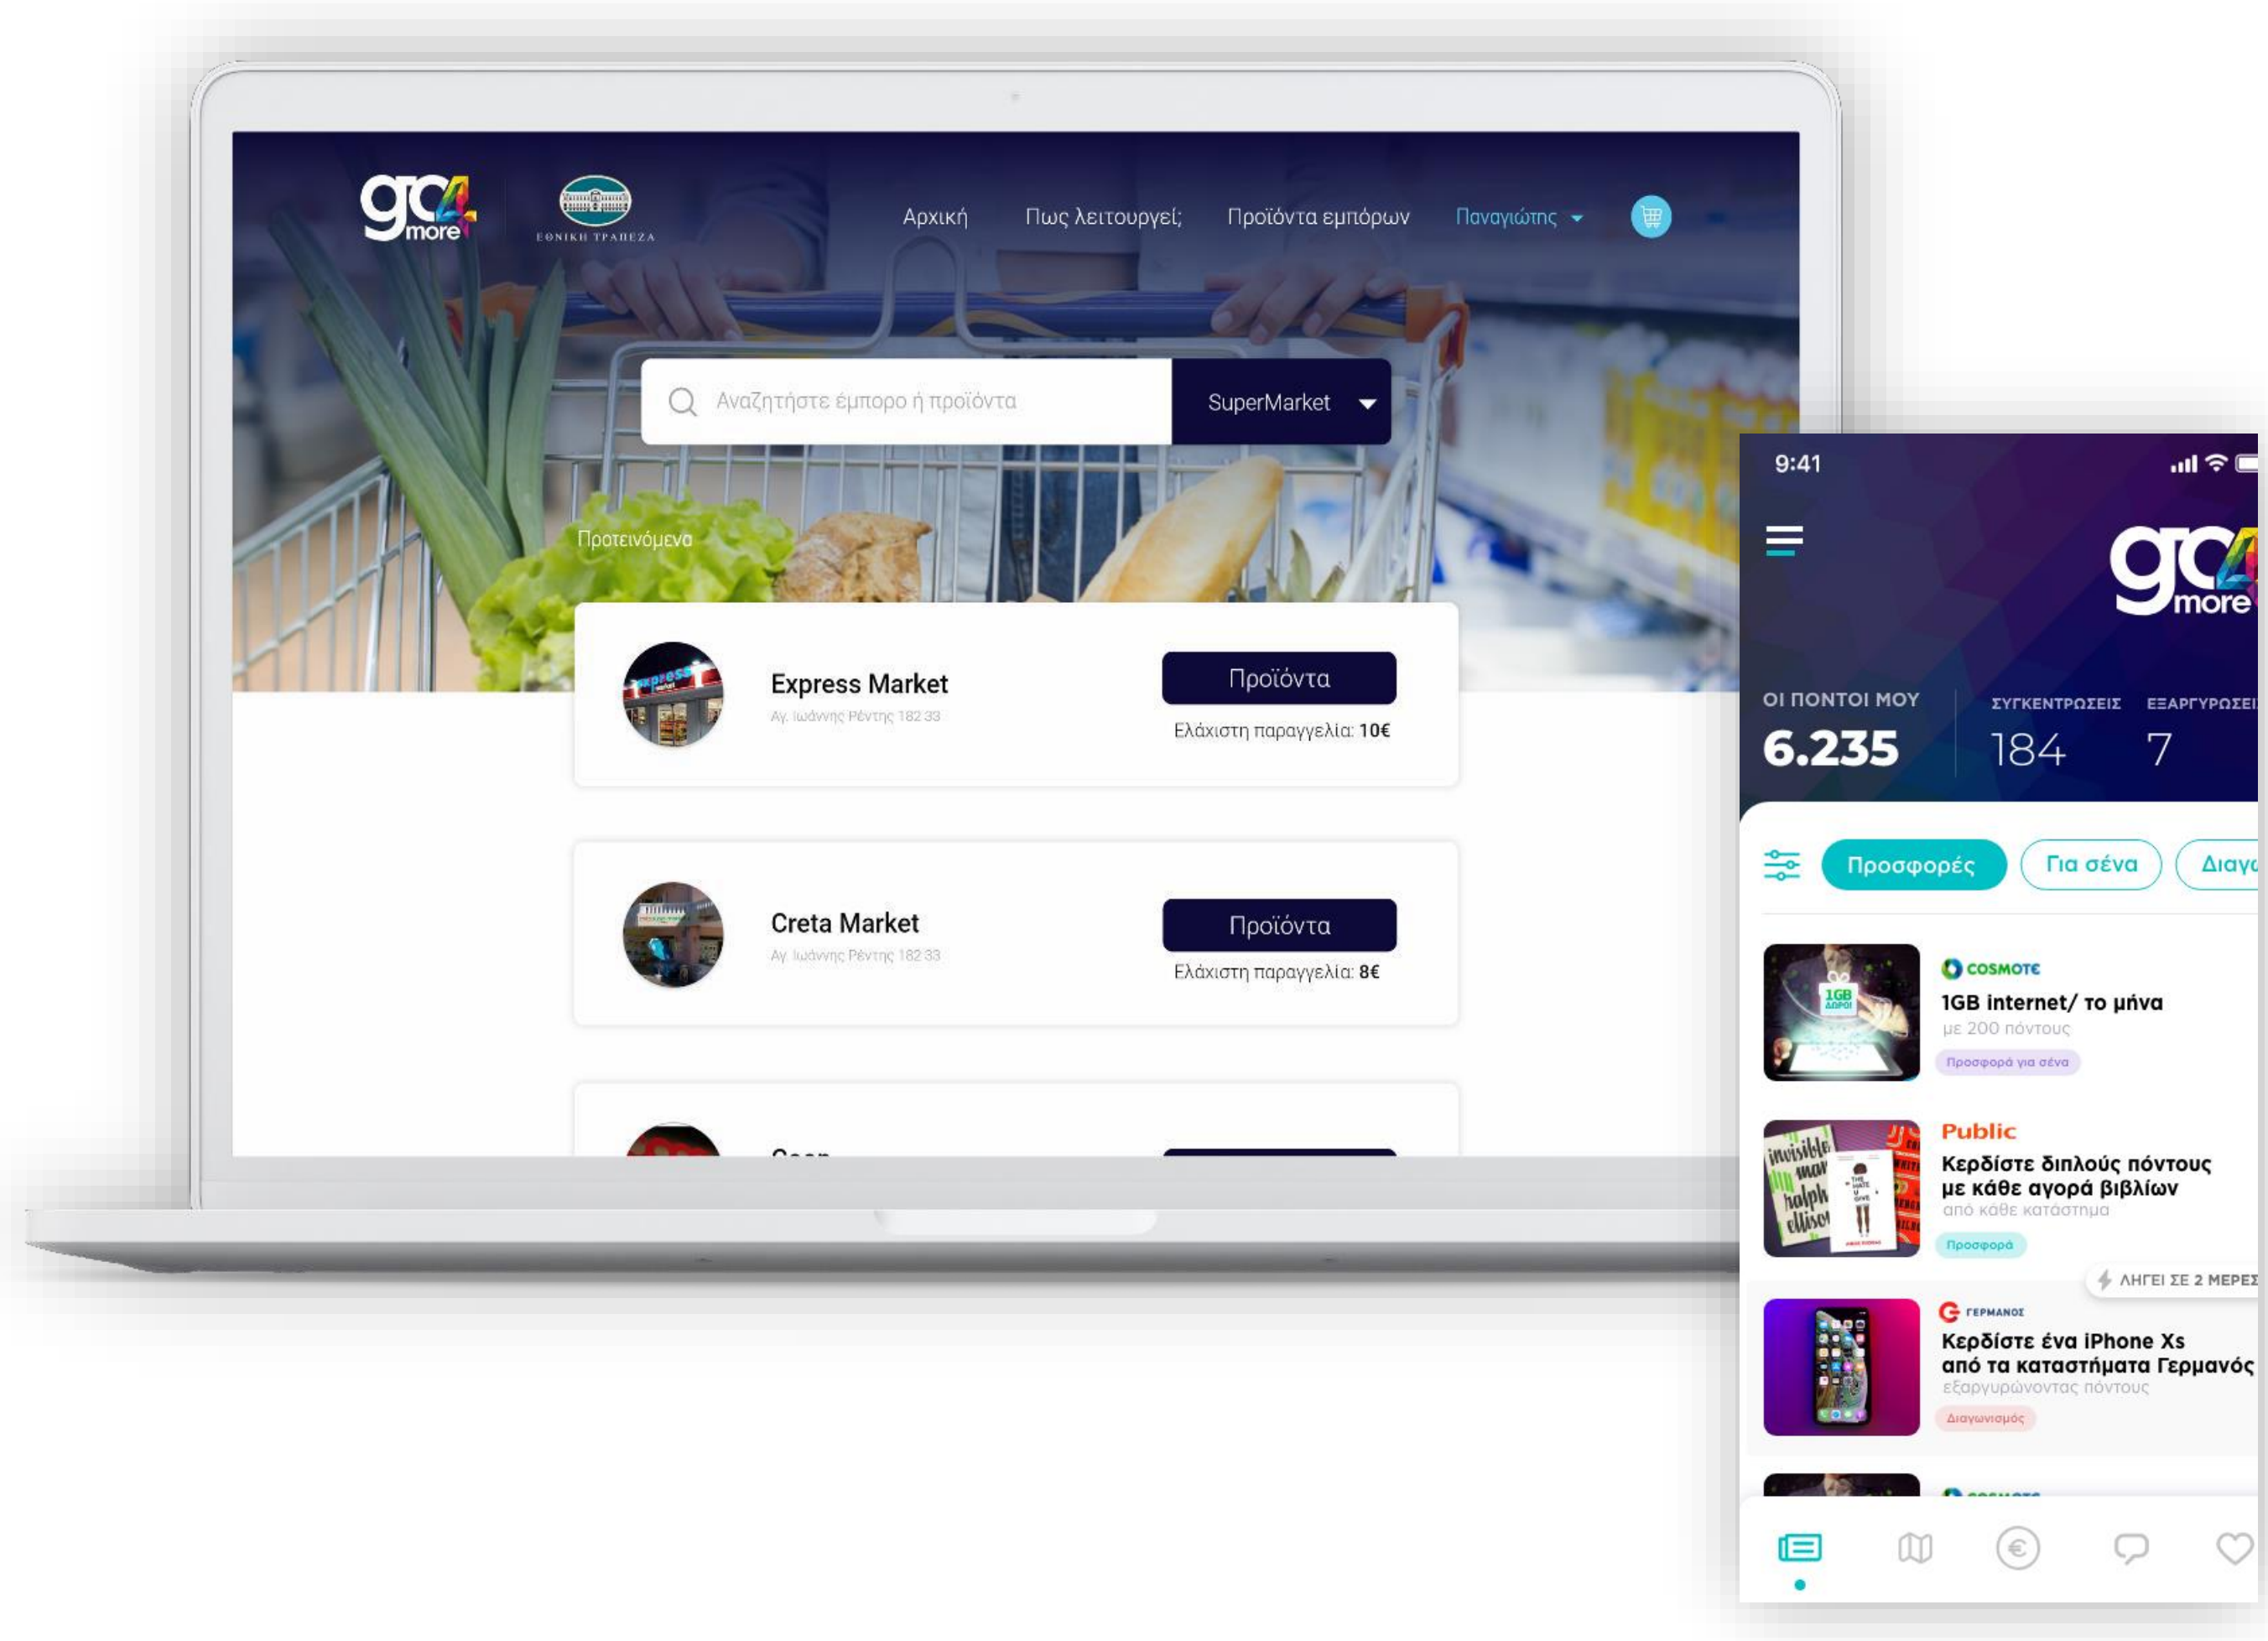

Skip-the-line

User can complete payment without having to wait in the que and pick up the products he has ordered by skipping-the-line.

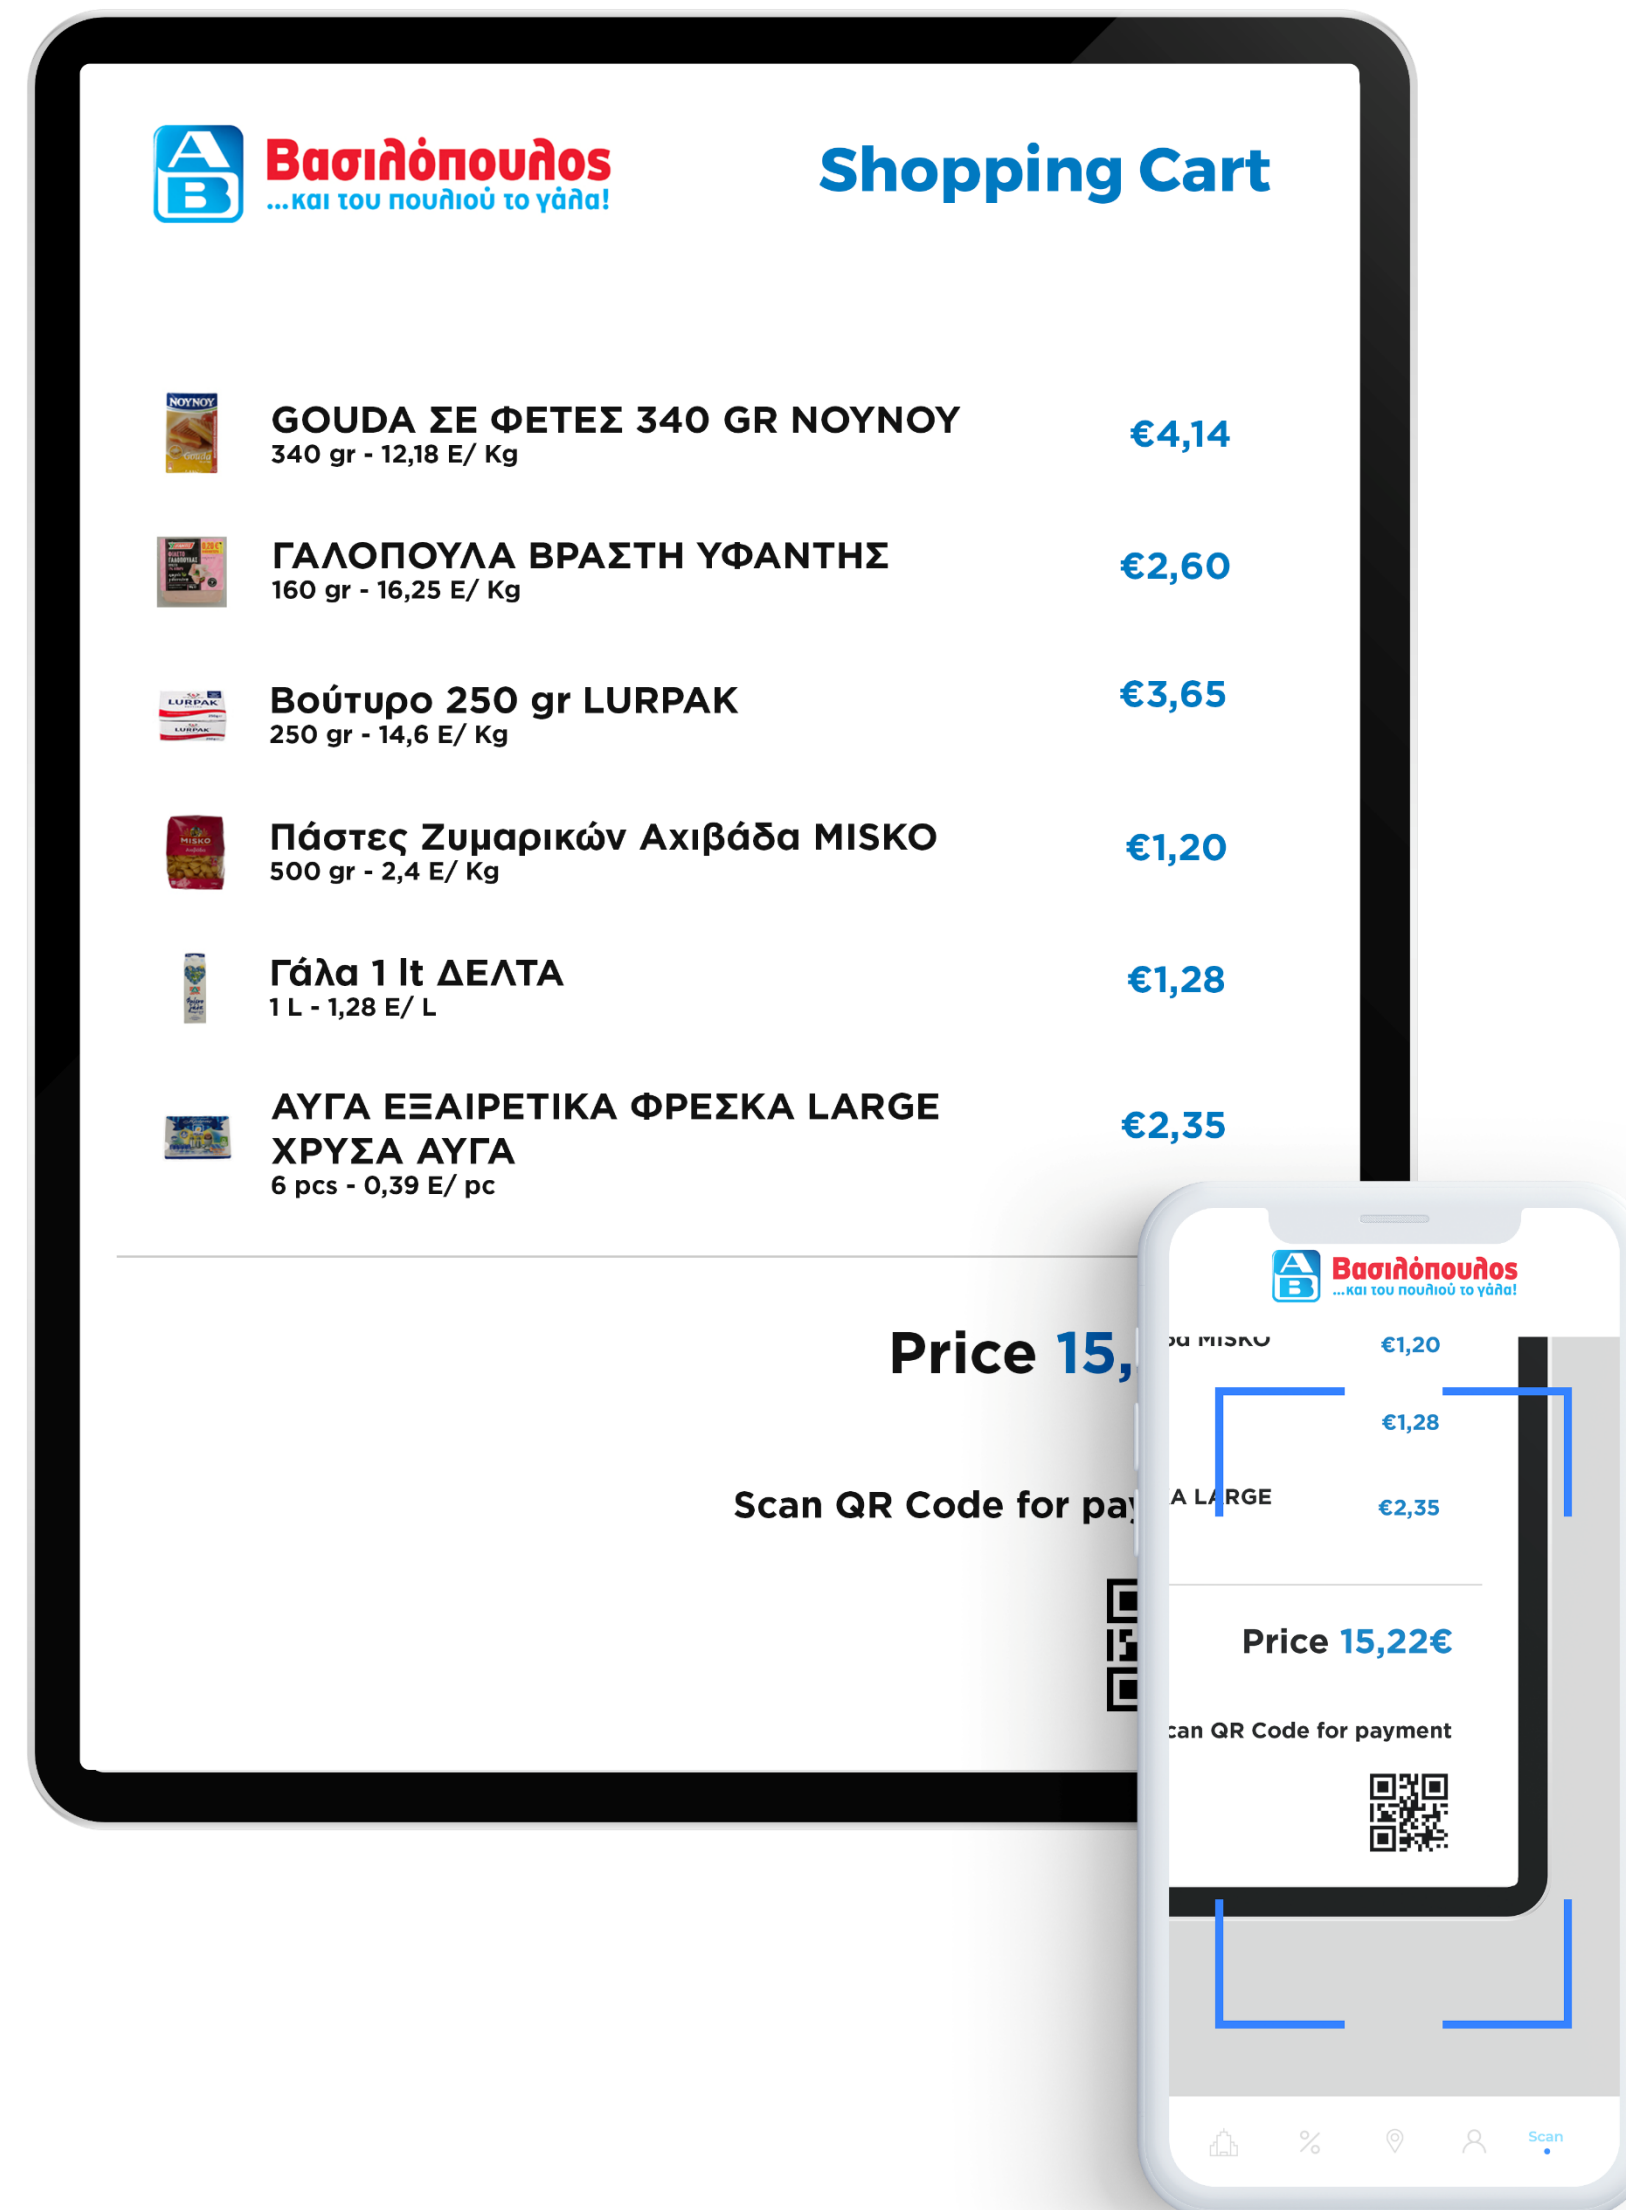

Merchant eOrdering

Users can order online while completing their payment via app or eshop.

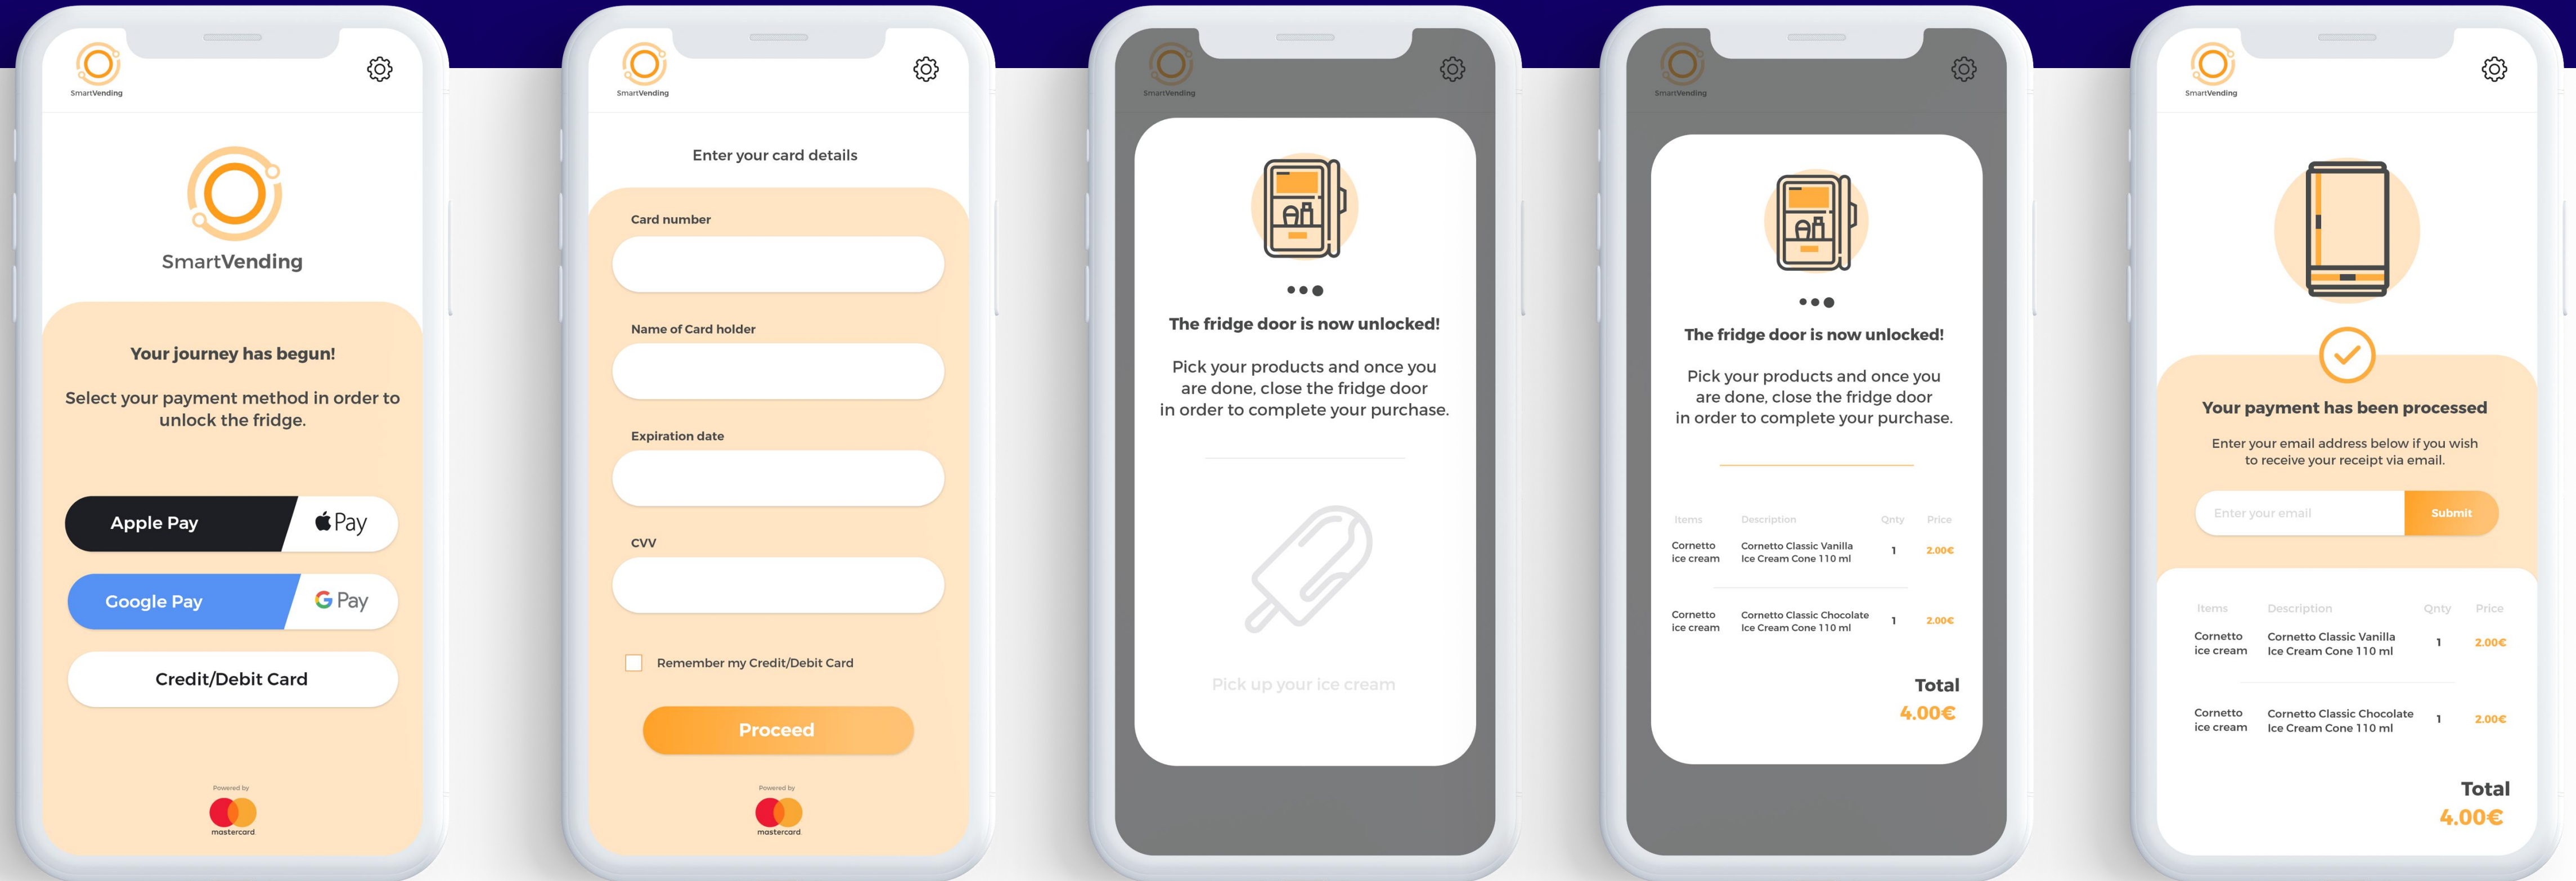

Self Checkout

User can scan products in the self checkout and during the checkout process, a simple scan of the QR code from the registrar will allow him to complete payment via his own smartphone device (either by app or landing page).

Pay Later

User can select payment method, add payment details, once preauthorization occurs and the amount of money is occupied from the user's account, user is able to proceed in his product selection and once product selection process is complete, payment is then completed.

A grayscale photograph of a person's hands interacting with a laptop and a tablet. The person's left hand is on the laptop keyboard, while their right hand holds a tablet. The laptop screen displays a complex interface with various data fields and tables. The text 'INTEGRATED TRADE CASES' is overlaid in white, bold, sans-serif font, with a stylized 'V' logo to the left of the text.

INTEGRATED TRADE CASES

Exports
