CopelouzosGroup

Copelouzos Group ("Group") of companies is a fully integrated business development organization that specializes in strategic economic growth areas and specific industrial sectors, where its expertise and knowledge enable it to play an instrumental role in the conception, development and implementation of large-scale, industrial, technological, and infrastructure projects.

The Group has a diversified range of activities involving airport and other concessions, energy related projects in the oil and gas sectors, participation in the design and implementation of projects in power generation from conventional and renewable energy sources, and investments in various infrastructure projects. Along with energy and infrastructure, the Group is active in various other business sectors, such as construction, real estate, exhibition & congress centers, out-of-home advertising, electromobility, and shipping.

Copelouzos Group has established long-lasting relationships and joint ventures with global groups including inter alia the German Fraport, the Canadian PSP, the Italian Snam, the Spanish Enagás, the Belgian Fluxys, the Italian Italgas and the Italian Ferrovie dello Stato Italiane.

Visit us at copelouzos.gr.

gastrade

With a strategic focus on supply security, energy source diversification and cross-border interconnectivity, Gastrade S.A. actively contributes to shaping a sustainable and resilient energy landscape for Greece and Southeastern Europe. The Company developed and, since October 2024, operates the Alexandroupolis Independent Natural Gas System, one of the region's most significant energy infrastructure projects.

Gastrade is also a key participant in the European Vertical Gas Corridor initiative, promoting the uninterrupted flow of natural gas from Greece to the markets of Southeastern and Central Europe, thereby supporting energy stability, sustainable growth and regional integration.

Gastrade S.A. is currently developing the Thrace Independent Natural Gas System, a project that will further strengthen Greece's role as a regional energy hub.

ONEX
Shipyards & Technologies Group

Founded in 2004, ONEX Shipyards & Technologies Group is a U.S.-registered industrial group that, through successive transformations, has grown into Greece's largest shipyard group and the main driving force behind the revival of Greek shipbuilding. The Group is evolving into the Mediterranean's leading Blue Economy hub, structured around five pillars: Shipbuilding & Naval, Shipping, Energy, Ports, and Technologies. Its asset base stands at €1.5 billion, according to the latest independent valuation, and its Vision 2030 targets at least €5 billion in assets.

ONEX is the first European shipyard group to secure financing from the U.S. International Development Finance Corporation (DFC), with $125 million for Elefsina Shipyards. Together with Hanwha Ocean, it launched Project TRIDENT, the first trilateral shipbuilding alliance among the U.S., Greece, and South Korea. TRIDENT is a €1.35 billion investment plan encompassing the TRITON KSS-III submarine program, designed to integrate American combat systems and provide maintenance, repair, and overhaul (MRO) capabilities in support of allied fleets, including the U.S. 6th Fleet. As a U.S.-registered group, ONEX is evaluating an expansion of its industrial footprint into the United States, including shipbuilding and MRO operations to support allied naval programs and the revitalization of the U.S. shipbuilding industrial base.

Through strategic acquisitions, ONEX revived two historic shipyards: Neorion Shipyards on Syros, officially founded in 1861 with roots in traditional shipbuilding during the Greek Revolution of the 1820s, and Elefsina Shipyards, founded in 1968. Together, they form Greece's largest shipbuilding complex, supporting more than 3,000 direct and indirect jobs. The Group has provided repair and refit services for more than 980 vessels, setting a national record, and is on track to reach 1,000 vessels by year-end. It provides integrated technical and operational support to leading commercial fleets.

ONEX's growth strategy extends across the maritime value chain. The Energy pillar is developing floating build-and-operate solutions to utilize U.S. liquefied natural gas (LNG), including floating power units, storage, and LNG infrastructure. These solutions are intended to serve island grids, ports, industrial facilities, and data centers in Europe, Western allied nations, and other countries seeking energy independence and resilience. In ports, the Group is developing dual-use infrastructure within Elefsina and advancing a structured investment plan for additional strategic ports. This includes cooperation with the Port of Antwerp-Bruges to develop port and logistics infrastructure, multimodal transport, and strategic mobility in support of Europe's energy and supply security. ONEX is a member of the Hellenic Ports Association (ELIME).

A targeted €200 million investment in a state-of-the-art production line for 20 tugboats designed by Robert Allan Ltd encompasses both construction and ownership. The production line underpins ATLAS, which ONEX is developing into the largest tug and salvage group in the Eastern Mediterranean, strengthening operational autonomy, towing services, and port safety. In defense, the Group is building domestic capabilities for the construction, upgrade, and maintenance of advanced surface combatants and submarines, as well as unmanned underwater and surface vessels for surveillance, intelligence, and the protection of critical infrastructure.

PPC is the leading Powertech Group in Southeastern Europe. At the forefront of the new wave of electrification, the Group plays a pivotal role in Greece's and the wider region's digital transition, through strategic investments in energy and technology infrastructure.
The transformation of PPC Group is based on building a clean and flexible energy portfolio, by investing in renewables, flexible generation, and grids, while placing the customer at the center of its commercial strategy.
In the energy sector, PPC operates as a fully integrated utility Group, with activities spanning electricity generation, distribution and the sale of advanced energy products and services. The Group operates primarily in Greece, Romania and N. Macedonia, while further expanding its RES footprint in Italy, Bulgaria, Croatia, and Poland.

The Group's installed capacity stands at 12.6 GW, generating approximately 22 TWh of electricity annually. PPC is the largest energy supplier in Greece, and one of the largest in Romania, serving 8.6 million customers and supplying them with 31 TWh of electricity annually, alongside a wide range of energy products and services. PPC is also active in the electricity distribution, with a total Regulated Asset Base of €5.7 bn as of year-end 2025.
In the technology sector, PPC Group is taking a leading role by investing in cutting-edge technologies, ranging from a nationwide fiber-to-the-home (FTTH) network to international telecommunication cables, data centers, and AI.
The Group's new Strategic Plan 2030 targets growth opportunities across Central and Southeast Europe, featuring €24 bn in investments focused on RES, storage, flexible generation, and data center infrastructure.

PPC Group integrates responsible environmental and social practices across its operations, creating shared value for society and the environment. The Group's ESG progress is reflected in upgrades by international organizations such as S&P Global, EcoVadis, CDP, Sustainalytics, MSCI, ISS and ATHEX ESG, as well as in its participation in the global Science Based Targets initiative (SBTi) for climate action.
Founded in 1950, PPC has been listed on the Athens Stock Exchange since 2001, with its shares trading on the Main Market of Euronext Athens.

THE VIGILIS GROUP

Vigilis Group is an intelligence-led risk management and advisory firm serving defense, corporate, and government clients across the globe. Headquartered in McLean, Virginia, Vigilis combines rigorous analysis with operational depth. Advisory at its core, intelligence at its foundation, and in-extremis capability when circumstances demand it. In an era defined by geopolitical volatility, contested supply chains, and accelerating technological disruption, organizations face risks that are increasingly difficult to anticipate and costly to misjudge. Vigilis exists to close that gap. The firm helps clients understand the environments in which they operate, anticipate the threats that matter, and act decisively when exposure becomes acute. With operational reach across Europe, the Middle East, Africa, and the Americas, Vigilis maintains the presence and relationships required to act where and when it matters.

Vigilis operates across four integrated pillars. Risk & Intelligence delivers threat assessment, intelligence gathering and analysis, and due diligence that informs high-stakes decisions. Crisis & In-Extremis Operations brings crisis management and decisive response to environments where exposure is acute and the margin for error is narrow. Advisory & Resilience equips leadership with the strategic counsel needed to build durable, defensible organizations. Critical Infrastructure & Cyber Security protects facilities, systems, and information environments through technical security, TSCM, SCIF design, and integrated cyber defense.

Behind each pillar stands a team of seasoned intelligence, military, and advisory professionals who have operated at the highest levels of national security. This integration is deliberate. Intelligence without the capacity to act is incomplete; operations without analysis are blind. Vigilis brings both together, allowing clients to move from insight to decision to execution within a single trusted relationship.

The firm's work is grounded in a principle that distinguishes it from conventional security providers: risk is a strategic discipline, not a commodity. Vigilis delivers judgment informed by intelligence, refined through advisory engagement, and backed by the ability to respond in extremis when the stakes are highest. For clients navigating the world's most demanding operating environments, Vigilis Group offers what matters most: clarity under pressure and the means to act on it, when every moment counts.

HELLENiQ ENERGY

HELLENiQ ENERGY is one of the leading integrated energy companies in Southeast Europe. Established as HELLENIC PETROLEUM in 1998, with roots dating back to Greece's first refinery in 1958, HELLENiQ ENERGY has grown to become one of Greece's largest companies and one of the biggest energy groups in SE Europe. Vigorously pursuing an ambitious transformation strategy, it has successfully evolved into a regional energy leader and currently has presence in 8 countries and growing international operations, with a diversified portfolio spanning across the energy value chain.

HELLENiQ ENERGY is active in the production, supply and trading of all types of energy, with an increasing focus in clean energy and renewables. Its portfolio includes refining, supply and trading of oil and petrochemical products, hydrocarbons exploration and production, as well as fuels marketing, while growing fast in the renewable energy business. The establishment of HELLENiQ Petroleum Trading in Switzerland reflects the company's significantly enhanced international footprint.

Moreover, HELLENiQ ENERGY is developing an integrated Green Utility strategic business unit, following the 100% acquisition of Elpedison, now Enerwave, a Greek power and gas generation and supply company. This new business will produce and supply energy -primarily from renewables- directly to the Greek market, delivering on the Group's commitment to a just, affordable, and secure energy transition.

At the heart of HELLENiQ ENERGY's strategy is the development of its human resources, with the aim to be an employer of choice in the countries where it operates. At the same time, Corporate Responsibility is one of the key pillars of its operations, through which HELLENiQ ENERGY develops multi-dimensional programmes to support the younger generation and society at large, positively affecting more than 2 million people each year internationally.

Headquartered in Athens, Greece, HELLENiQ ENERGY is listed on the Athens Exchange (ticker: ELPE), with a secondary listing on the London Stock Exchange (LSE: HLPD) through Global Depository Receipts (GDRs).

P&G brands like Pampers, Ariel, Fairy, Swiffer, Gillette, Oral B and Always are trusted for use every day in millions of living rooms, kitchens, laundry rooms, and bathrooms—and have been passed down from generation to generation.

For more than 185 years, we are striving to challenge the norm and inspire for the future—from the products we put on the shelf to the diverse people we bring onto our teams.

P&G established its presence in Greece in 1960. For more than six decades we consistently focus on three simple things: leadership, innovation and citizenship. These guiding ideas have allowed us to serve consumers effectively while contributing positively to the communities we operate in, through our products, citizenship programs and the everyday contributions of our employees.

This is our story, a story of superior quality and innovation at P&G. Our company began with a bar of soap, a box of candles, and a handshake between two visionary men who believed everyday products could and should be of the highest quality. Their belief inspires P&G people throughout the world still today and touches millions of consumers, striving to make their everyday a little bit better.

GE HealthCare

Who we are
GE HealthCare Technologies Inc. is a leading global healthcare solutions provider of advanced medical technology, pharmaceutical diagnostics, and AI, cloud and software solutions that help clinicians tackle the world's most complex diseases. Serving patients and providers for 130 years, GE HealthCare is delivering bold innovations designed for the next era of medicine to help clinicians deliver more personalized, precise patient care.

Our three business units
Advanced Imaging Solutions: AIS includes an AI-enabled portfolio of MR, CT, Molecular Imaging, Women's Health, X-ray, Ultrasound, Image-guided solutions, and enterprise imaging to create a more focused and connected end-to-end imaging ecosystem spanning diagnosis, intervention, and follow-up across disease states.
Pharmaceutical Diagnostics: Our PDx segment supplies contrast and radiopharmaceutical imaging agents to the global radiology and nuclear medicine industries. These agents help clinicians assess patients to enable more precise diagnoses, monitor disease progression, and enable better therapy selection. We distribute products globally that help meet patient and procedural needs across a multitude of modalities. PDx's diagnostic agents are complementary to the imaging and ultrasound devices we offer, including CT, angiography and X-ray, MR, SPECT, and PET, and are also compatible with systems from other equipment vendors.
Patient Care Solutions: Our PCS segment serves care teams and healthcare systems across multiple patient care needs including Monitoring Solutions and Life Support Solutions. Our broad portfolio of connected devices and digital solutions is complemented by a comprehensive suite of service offerings.

Creating a world where healthcare has no limits
We are a $20.6 billion business with over 54,000 colleagues and included in the S&P 500, Nasdaq-100 and Fortune 500
We execute on our precision care strategy at the forefront of care delivery across the patient journey, serving 1B+ patients annually and 5M+ installed base equipment
We play a central role in healthcare digitization with 200+ software apps driving breakthroughs in clinical insights
We are a leader in an attractive $90B global healthcare market
We are led by an experienced leadership team with the right strategic vision

Our care pathway approach
Our global teams collaborate to deliver products, services and solutions that touch nearly every part of the patient journey across key disease- specific states like cardiology, neurology and oncology. We are innovating to help clinicians improve patient outcomes and reduce the time from diagnosis to treatment.
Innovation
We are a proven innovator with a history of delivering industry firsts to advance the future of healthcare: first full-body CT, commercialization of MR, handheld ultrasound, first and only iso-osmolar contrast medium, first hospital command center, and topping the FDA's list with the most AI-enabled device authorizations of any medtech company, with 120b). We are developing new capabilities for the future, leveraging AI and machine learning to connect healthcare workflows across operations, data silos, and analytics.
Trusted partner
Our portfolio of solutions addresses the biggest challenges facing the healthcare industry today, including helping clinicians provide better outcomes, improve operational efficiencies and enhance productivity. These qualities foster trust, loyalty and partnership with our global customer base in approximately 160 countries.

hellas gold
A MEMBER OF ELDORADO GOLD

Hellas Gold is a precious and base metals mining company headquartered in Athens.
Since 2004, it has been responsibly and safely developing and operating the Kassandra Mines Complex in northeastern Halkidiki under the strictest environmental standards. The Kassandra Mines Complex comprises the Skouries mine (copper and gold), the Olympias mine (gold, silver, lead and zinc), and the Stratoni–Mavres Petres mining and port facilities.

The completion of construction at Skouries and the project's transition to production mark a new chapter for Greek industry and responsible mining in the country. They also contribute to the development of copper resources, a strategic metal for European industry and the energy transition.

Building on a mining tradition spanning 25 centuries in the region, Hellas Gold invests in the sustainable development of the Kassandra Mines Complex, with total investments exceeding US$3 billion and the creation of 3,000 stable, well-paid jobs. Through local employment, longstanding partnerships with Greek suppliers and social investments in local development projects, the company contributes to national and local prosperity.

Since 2012, Hellas Gold has been a subsidiary of Eldorado Gold Corporation, a Canadian mining company with more than 30 years of international experience in mineral exploration, mine development and operations.

ROLEX

An unrivalled reputation for quality and expertise

Rolex is an integrated and independent Swiss watch manufacture. Headquartered in Geneva, the brand is recognized the world over for its expertise and the quality of its products – symbols of excellence, elegance and prestige. The movements of its Oyster Perpetual and Perpetual watches are certified and tested in-house for their precision, performance and reliability. The Superlative Chronometer certification, symbolized by the green seal, confirms that each watch has successfully undergone tests conducted by Rolex in its own laboratories according to its own criteria. These are periodically validated by independent external organizations.

'SUPERLATIVE' – inscribed on every Oyster watch – represents the philosophy and values of Rolex. It embodies the notion of perpetual excellence instilled by the brand's founder, Hans Wilsdorf, which drives the company forward and carries through into everything it does. This ethos led Rolex to pioneer the development of the wristwatch and numerous major watchmaking innovations, such as the Oyster, the brand's first waterproof wristwatch, launched in 1926, and the Perpetual rotor self-winding mechanism, invented in 1931. In the course of its history, Rolex has registered more than 700 patents. At its four sites in Switzerland, the brand designs, develops and produces the majority of its watch components. A fifth site, also in Switzerland, is under construction and is expected to open in 2029. Rolex carries out its own manufacturing operations, from casting the gold alloys to machining, crafting, assembling and finishing the movement, case, dial and bracelet. Furthermore, the brand is actively involved in supporting the arts and culture, sport and exploration.
